

Edward DIMOUT

Item number 28790, KMAT 61000252

Product description

Dimout curtains are blackout fabrics that are able to reduce the usual 40% light transmission to just 1%. The degree of darkening is 99%, depending on the color. Dimout fabrics are a double satin with a black weft. These two components create a very dense, softly flowing fabric that hardly lets any light through and has excellent acoustic properties. Edward is a dimout with floral ornaments. The design is created using an elaborate embossing and printing process. The blackout fabric gets its modern look from strong, clear colors such as refreshing shades of blue, rich greens and bright shades of red. Edward is predestined for use in the health & care sector as well as in the hotel industry.
