Product description

DELIMAR fabrics have been specially developed for outdoor use. This upholstery fabric is made from the innovative Polyolefinic FR fiber, which permanently combines many positive properties. Flame retardancy, high light fastness, chlorine and seawater resistance and weather resistance are the hallmarks of this special fiber. The designs are machine-washable at 40°C and quick-drying, so that mold and bacteria cannot form in the first place. DELIMAR fabrics are free of harmful substances, antistatic and water-repellent. Feroe has a coarsely textured surface woven from three different yarn colors. A warm natural tone forms the basis and is complemented by coordinated strong tones. This creates an exciting interplay of colors. DELIMAR fabrics should not be missing in the hotels and on the cruise ships of this world. With their memorable structures, they are an enrichment for the rooftop bar, the pool area, the outdoor lounge, the spa or the summer terrace. But they also create a special ambience indoors and offer great added value with their easy-care functions.
