Item number 26999, KMAT 61000083

Product description

Wool is an extraordinary fiber from nature that produces extremely high-quality and sustainable fabrics thanks to its properties. Obtained from sheep's fur, wool is a renewable raw material. The positive properties of wool result from the complex structure of the fiber. Wool fabrics are equally suitable as upholstery fabrics and curtain fabrics. They radiate warmth and homeliness and can have both a cozy and puristic appearance. The large-format Glasgow check stands out with its bold color scheme. Particularly bright colors such as bright orange, bright pink and deep purple give the color palette the appropriate modernity. The selection consists of 15 colors and can be wonderfully combined with our plain Watson.
