Safe & Clean No. 5

DELIGARD Reinheitssystem – nachhaltige Sauberkeit bei starker Beanspruchung

DELIGARD Möbelstoffe bieten mit ihrem einzigartigen Reinheitssystem Schutz vor Verunreinigung und verlängern so den Lebenszyklus der Polstermöbel.

DELIUS Möbelstoffe mit DELIGARD Technologie weisen gegenüber herkömmlichen Möbelstoffen einen erhöhten Grad an Nässe- und Schmutzabweisung auf. Das innovative System schützt vor Bakterien, verringert das Keimwachstum und ist atmungsaktiv.

Die Oberfläche ist von einer Spezialbeschichtung überzogen, die das Gewebe vor dem Eindringen von Verunreinigungen – bei ordnungsgemäßer Pflege – langanhaltend schützen kann. Die Schutzschicht auf der Rückseite verringert das Durchdringen von Feuchtigkeit und Nässe in das Polster.

DELIGARD Easy Cleaning System – sustainable cleanliness for heavy use areas

DELIGARD upholstery fabrics with their unique purity system offer protection against soiling and thus extend the life cycle of upholstered furniture.

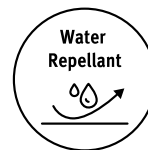

DELIUS upholstery fabrics with DELIGARD technology have an increased degree of moisture and dirt repellency compared to conventional upholstery fabrics. The innovative system protects against bacteria, reduces the growth of germs and is breathable. The surface is covered with a special coating that can provide the fabric with long-lasting protection against the penetration of dirt - if cared for properly. The protective layer on the back reduces the penetration of moisture and wetness into the foam used.

Système de pureté DELIGARD – propreté durable même en cas d'usage intensif

Grâce à leur système de pureté unique, les tissus d'ameublement DELIGARD offrent une protection contre les salissures et prolongent ainsi le cycle de vie des meubles rembourrés.

Les tissus d'ameublement DELIUS dotés de la technologie DELIGARD présentent un degré accru de résistance à l'humidité et aux salissures par rapport aux tissus d'ameublement traditionnels. Ce système innovant protège contre les bactéries, réduit la croissance des germes et est respirant.

La surface est recouverte d'un revêtement spécial qui peut protéger durablement le tissu contre la pénétration d'impuretés - à condition d'être correctement entretenu. La couche de protection au verso réduit la pénétration de l'humidité et de l'eau dans le rembourrage.

Product information

Always up to date

Die vorstehenden technischen Daten sind allesamt Durchschnittswerte, die lediglich die technischen Eigenschaften und die chemische Zusammensetzung der gelieferten Ware beschreiben. Garantien werden nicht abgegeben. Bei Anfärbungen durch Bekleidungsstoffe auf Polstern handelt es sich um einen Fehler am Bekleidungsstoff. Da hier das Verursacherprinzip gilt, sind Anfärbungen von Textilien von jeglicher Herstellergarantie ausgenommen.
All the above technical data are of average value and merely describe the technical characteristics and chemical composition of the delivered goods. No guarantee is given. The colouring of upholstery fabrics by clothing fabrics is due to the clothing fabric. It is not a fault of the upholstery fabric. Therefore any liability by the producer of the upholstery fabrics is excluded.
Toutes les données techniques ci-dessus sont des valeurs moyennes qui décrivent uniquement les caractéristiques techniques et la composition chimique de la marchandise livrée. Aucune garantie n'est donnée. Dans le cas de colorations de rembourrages causées par des tissus de vêtements, il s'agit d'un défaut du textile de vêtement. Comme il est ici question du principe de responsabilité, les colorations de textiles sont exclues de toute garantie du fabricant.
